

Name:

Grade:

Date:

Letters to Marie Curie

Objective:

To get to know the life and work of Marie Curie and highlight her discoveries and the contributions of her work in the field of science.

Materiales:

- Sheets of paper
- Pencils
- Colors

Instructions:

1. Students will research the life and work of Polish scientist Marie Curie.
2. Once they have enough information about this scientist, they can write a letter to congratulate her by highlighting one of her achievements and explaining why her work caught their attention, their opinion about it and the contribution she made to the world.
3. Students can decorate and design the letter using their creativity inspired by her work.
4. The teacher can organize an exhibition with the letters of the students or create a trunk of memories from the letters to Marie Curie and other prominent people students can research.
