

Name:

Grade:

Date:

Addition Lottery

◆ Objective:

To strengthen the mental calculation of simple sums through a lottery game.

◆ Materials:

- 10 boards of additions results
- Cards of additions

◆ Instructions:

1. Have students form pairs.
2. Give a card with the answers to each couple.
3. Cut the cards of the sums and place them in a bag.
4. Take the cards one by one saying the sum so that each pair look on their cardboard if they have the answer to mark it.
5. Keep playing until someone completes the six sums and yells LOTTERY.
